

IMPORTANT NOTICE

Thank you for your trolling motor purchase and trust in Minn Kota. We are honored to fish with you.

Like many products, our motors have been impacted by global supply chain shortages. To get you on the water and on the fish as soon as possible, this motor was shipped without a Bluetooth™ heading sensor that enables the Jog feature and the i-Pilot® remote has been temporarily replaced with a micro remote.

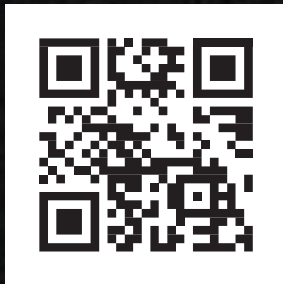

We appreciate your patience and will ship your heading sensor and the i-Pilot remote as soon as they become available.

Please see the reverse side of this card for further redemption details.

HOW TO REDEEM

To receive your Bluetooth™ heading sensor and remote:
Scan this QR code or visit www.minnkotapromotions.com

After registering, Minn Kota will provide you regular updates on the status of receiving your heading sensor and remote.
