Hazard: The biometric lock on the gun safes can be opened by unauthorized users, posing a serious injury hazard and risk of death. Consumers may believe they have properly programmed the biometric feature when in fact the safe remains in the default to open mode, which can allow unauthorized users, including children, to access the safe to remove hazardous contents, including firearms.

Recalled Products:
- 11B20 Fortress Portable Safe with Biometric Lock
- 44B20 Fortress Medium Personal Safe with Biometric Lock
- 44B10 Fortress Personal Safe with Pop up door and Biometric Lock
- 44B10L Legend Range and Field Personal Safe with Pop up door and Biometric Lock
